

Faizy Jamal, UI / UX Designer

A passionate graphic designer who is now eager to move on to the next level of designing. I enjoy creating user-friendly visual designs for web/mobile applications. I relish taking on challenges and turning complex problems into solutions. I am profoundly deaf but with the help of today's newest technology including the Cochlear Processor and other advanced assistive devices I am able to hear and work independently. I strongly believe in my ability to perform and succeed in achieving my goals and produce best results.

EXPERIENCE

DEAFMATRIX, HOUSTON, TEXAS - Founder & UI / UX Designer

DeafMatrix is a social networking app for the deaf and hard of hearing community. This app will be of service to millions of deaf friends around the world with the help of today's most advanced technology. We are bringing our community together on one platform where they can connect people with similar interests, share experiences, provide latest news, and post upcoming events in the deaf world.

Lezanta | Live Popup Captions, HOUSTON, TEXAS - Founder & UI / UX Designer

Lezanta is a live transcription app that turns system voice into text on the same screen as the other app using PIP feature. It will feature on social media platforms, facetime, and phone calls. The app is great for both hearing and deaf/hard-of-hearing people.

September 2020 – Present

(Both will be available on App Store and Android Store soon)

- Development, upgrading, maintaining, and marketing the electronic platform (App).
- UX research on the user experience, market gaps, and testing.
- Analyzing and integrating UX feedback in continued improvements of the app.

PARCEL PLUS, HOUSTON, TEXAS - Graphic Designer

August 2018 – October 2019

- Troubleshooting, networking, maintaining and upgrading operating systems, and installation of IP security camera systems.
- Designing brochures, business cards, posters, video commercial
- Responding to customers' email about the packaging and shipping prices.
